## Working Experience

- currently **CTO at RealverseVR** Start Up  
Chief Technology Officer, Head developer of 'Realverse' - Creating experiences for education through emerging technologies such as Virtual and Augmented reality.
- 2018 – 2021 **Sales Staff** La sportiva, Ziano di Fiemme  
I worked for three summer at La Sportiva, one of our business excellence in our territory for the production and the development of mountaineering equipment since 70 years. I was able to improve my selling skills as well as my speaking capacity.
- Internship
- 2017 – 2017 **Junior Developer** Suggesto  
First internship in a Software company, my primary role was developing a project for mesh networks, creating content as well as testing the infrastructure to make improvements.
- 2017 – 2017 **It-component repair** RepairMy, Dublin  
I worked for 4 weeks at a store which repaired laptops, phones and desktops. My work was to change some pieces, test tablets and ship them.

## Education

### Bachelor in Computer Science

- 2022 **Erasmus - Cognitive Science** Universität Osnabrück  
I spent 6 months, in a foreign university in Germany, to study cognitive science, I started to study Machine Learning and Computer Vision.
- 2019 – 2023 **Bachelor Computer Science** Free University Bolzano  
Curricular study in computer science, in a trilingual University: English, German and Italian. Student representative for 2 years, as well as helping students to reach their study goals.
- 2016 – 2019 **Maturità Italiana** ITT Marconi, Rovereto  
I graduated with 97/100 in the technical school in Rovereto with specialization in Computer studies
- 2017 – 2018 **Irish Leaving Certificate** CBS Mitchelstown, Mitchelstown  
During my 4th year abroad, other than learning a completely new language I was also able to prepare for the Irish Leaving Certificate. Graduated with 476/625

## About Me

I am a pragmatic and creative person with a passion for new technologies, particularly in the fields of artificial intelligence and computer vision. I am dedicated to using my skills and knowledge to help address the pressing issue of climate change. In my work, I focus on using technology and creativity to find solutions and make a positive impact on the world.

## Projects

- |            |  |                  |
|------------|--|------------------|
| 2019 – now | <b>Hackathons</b><br>Hackathons are part of my passions. I have been around Europe now to attend many of them. Every time I meet new people and create a connection that lasts through the years. The ratio of wins is 1/2. Recently I also participated in the HackZurich hackathon, in which we got the first price for the challenge "4D buildings".  | Around the world |
| 2019 – now | <b>iRefill</b><br>That is one of my long time projects. It started so many years ago, it changed so many times but is the one I am more proud of. I spent many hours developing around it, but the circumstances didn't allow any real applications yet. Therefore now we have a blog where we post about our thoughts about environmental topics, mainly related to packaging of food.                      | Valle di Fiemme  |
| 2021       | <b>Climathon Fiemme</b><br>I organized a climathon in my valley, together with 3 other young passionate about climate awareness. It was the first ever edition in Fiemme Valley and the only one in Trentino this year. It has been a success and more than 30 people participated with more than 6 ideas and business projects has come up, that will have a real implication to our small local community. | Predazzo         |
| 2021       | <b>Website Curator "sustfest"</b><br>Every year the University's students organize a festival centered around climate consciousness. The project involved many students bringing their opinion on the topic and so sharing ideas and knowledge. I curated the wordpress website and I also spoke, with the co-founder Giulia Cramarossa, about the project of iRefill.                                       | Bolzano          |
